

ELSA BRNO

presents

LAW OF INFORMATION TECHNOLOGY

ACADEMIC PROGRAMME

OF THE 3rd BRNO SUMMER SCHOOL ON IT LAW
2 – 9 AUGUST 2015

The European Law Students' Association

BRNO

General partner

Partners

South Moravian Region

Academic Programme

The main goal of this project is bringing closer IT Law issue to law students, both domestic and foreign ones, due to constantly increasing number of disputes which concern this branch as well as to the general trend of increasing number of law service demand in IT issue. Moreover, according to ELSA vision, we intend to support international recognition and understanding with reference to cultural diversity of European countries.

Brno Summer School on IT Law is going to focus on several specific questions and problems. Each topic will be gone through both in theoretical and practical levels. We set as our main aim to make participants not only understand IT Law issues but also to be able to apply the law in real life and to discuss controversial aspects of given topic.

Academic Program of Summer Law School is going to be divided into following blocks:

Alternative Dispute Resolution

Monday August 3rd

Lecturers:

Mgr. Pavel Loutocký, BA (Hons)

Mgr. Ing. Zbyněk Loebel

This block is focused on dealing with online disputes and on expounding techniques that are used to facilitate dispute resolution among parties. We will deal with negotiation, mediation and arbitration especially. In the afternoon there is a practical illustration prepared as well as involving participants into solving consumers' disputes via ODR system called YOUSJUSTICE (more on <http://www.youstice.com/en/>).

Privacy and Personal Data Protection

Tuesday August 4th

Lecturers:

Dr. Tamás Szádeczky

Wojciech Rafał Wiewiórowský, Ph.D – OSLOVEN...

More and more talked over topic of personal data protection on the Internet is going to be discussed on Tuesday. Lectures are going to be dedicated to the contemporary legislation and its gaps, as well as actual situation which is associated with the massive development of the Information Society.

Cyberwarfare

Wednesday August 5th (afternoon)

Lecturer:

Capt. Pascal Brangetto

Cyberwarfares are conflicts of the future. Virtual conflicts are launched on political grounds against computer and information systems of the enemies, thanks to which an aggressor can get to secret data or attack the infrastructure of given country, as happened in Estonia. All this has its dimension in legal world as well. According to magnitude of this problem, we want participants deepen their knowledge in this area with help of Capt. Pascal Brangetto from NATO Excellence Centrum for Cybernetic Security residing in Tallinn.

IP online

Thursday August 6th

Lecturers:

JUDr. Matěj Myška

Mgr. Lucie Straková

This part is going to be focused on intellectual property on the Internet – filesharing and legal protection of software. Sharing of files is nowadays quite a regular activity that offers effortless access to digital information and sources, including documents, multimedia (audio/video), graphics, computer programs, etc. This concerns private and public distribution of data and sources, but also illegal operation and downloading. What can be still tolerated and what is considered as an infringement of the Intellectual Property Law? At the forenoon the lesson is going to be led by JUDr. Matěj Myška from the Institute of Law and Technologies from Faculty of Law, Masaryk University in Brno, whereas at the afternoon by Mgr. Lucie Straková from Administration MU Department who will take over with Open Data Access.

WORK CAFÉ

Friday August 7th

Academic program is planned to be closed with an unusual event – a meeting of Czech start-up businessmen and the participants of the Brno Summer School to discuss IT Law issues in practise together. This will be the why, how the students will built a bridge from all the knowledge and skills they gained throughout the whole week to the practical usage of these. This mutually beneficial meeting will tak place in South Moravian Innovation Center, which serves as an “incubator” for Czech start-up business.

INSTITUTIONL VISITS

Brno Summer School is designed for 30 foreign and Czech students who should meet at least seven lecturers from the Czech Republic as well as Belgium, Hungary or France. To show how practise is connected to discussed matters, students will visit several institutions in Brno.

The Public Prosecutor’s Office – cyber criminality Wednesday August 5th (morn.)

With advance of informatics society a new challenge for public action also grows – cybercrime. How the Public Prosecutor’s Office is handling this subject matter will participants learn during visit of this institution, which gained excellent responses.

Faculty of Informatics - cybernetics polygon Wednesday August 5th (morning)

Cybernetics polygon is a “how to manage cybernetics attacks” trainer which was developed in cooperation with ISC MU and LaSaris. Most of the visit is going to be devoted to practical online illustration and all the participants are going to take part in.

LAW OF INFORMATION TECHNOLOGY

ECTS CREDITS

After successful graduation of Brno Summer School, participants will receive a certificate that confirms their participation and 5 international **ECTS credits**. Granting these credits is conditioned with minimal attendance, which will be controlled at every lesson. Every participant will be allowed not to take part in one block of academic program (it means forenoon or afternoon program).
